What is SNMP?
It stands for "Simple Network Management Protocol"

SNMP is an internet standard protocol for collecting and organizing information about managed devices on IP networks and for modifying that information to change device behavior. SNMP is widely used in network management for network monitoring.

SNMP ensures convenient network management for SI and business managers.

How does SNMP work?

In case of malfunctions or errors, real-time remote care is available. When an error occurs, a notification can be sent through the SNMP.
